

**Figure 3-28. Mean number of acoustic files per sampling period for two sampling periods of all bats at the 1991 and 2002 restoration sites.** “Early” refers to the September 12–14, 2002 sampling period (solid colored bars), and “Late” refers to the September 26–27, 2002 sampling period (bars with colored grids). At each site, detectors were deployed at three locations (A, B, C).
